

# Olympics at Risdon

## 2016

The Olympics have given our students many learning opportunities in the last 2 weeks and has enabled Risdon to work together to achieve many of our goals.

### Road to Rio

This activity was the whole school using their fitness time to run around the oval. Each lap a student ran would be used as 1 kilometre. Port Pirie to Rio is exactly 13, 776 km and after 2 solid weeks we achieved our goal. Each class received a learning token (or Gold Medal we like to call it) for the teamwork and use of our qualities.

Final Total 14,375km

### Taste of the Games

The activities which we see at the Olympics are not the common sports we see in our community. We created many of the activities including the hammer throw, discuss, javelin, triple jump, high jump to allow for our students to experience and understand the hard work it takes for an Olympian to achieve their goals.
